OUR GENESIS

Born out of a tsunami relief project by Dr. Bronner's, Serendipol has been making positive waves ever since.

What began with rebuilding lives has grown into something enduring — resilient relationships, thriving communities, and a deeper responsibility to care for the earth that sustains us.

OUR PURPOSE

To foster resilient relationships
that impact lives.

Our Ethos

Our core belief is that every business should aim to generate a positive impact for both people and the planet. We uphold this commitment by being a trustworthy partner and the leading global supplier of regenerative certified organic coconut.

Our Values

We are earth caretakers and community catalysts who build customer trust, earn the respect of farmers, and teach ourselves to grow continuously by doing things the right way.

Our Aim

To be the ingredient brand partner of choice for conscious brands worldwide.

We are a long-term partner to the world's most progressive brands.

Together we create great products, regenerate ecosystems, and build thriving communities.

WHY

REGENERATIVE ORGANIC CERTIFIED?

As a conscientious agri-business, Serendipol cannot ignore the profound impact of farming on climate change, marked by swift deforestation, alarming biodiversity loss, and a surge in carbon emissions.

The FAO estimates that, at current erosion rates, over

90%
of the earth's soil
could be degraded
by 2050.

If regenerative techniques are used on cultivated land across the world, that could offset over

40%
of global greenhouse
gas emissions.

You can learn more about our regenerative process here.

Serendipol is the world's first and foremost Regenerative Organic Certified[®] coconut company.

Regenerative Organic Certified[®] is the highest global standard for responsible businesses. It goes beyond both Organic and Fair Trade guidelines by factoring in stringent soil health, animal welfare, and social fairness requirements.

Working with Serendipol makes our certified regenerative organic agriculture supply chain part of your brand and products.

STRONGER COMMUNITIES

Creating Positive Waves

Healthcare

Rural Infrastructure

Education

Since 2007, Serendipol has invested over USD 3 million in local communities, prioritising healthcare, education, and rural infrastructure enhancements.

By partnering with Serendipol, you invest in tangible rural projects for education, healthcare, and infrastructure, contributing to community regeneration and upliftment.

You can learn more about our community projects here.

DIRECT FROM ORIGIN. VALUE BEYOND THE PRODUCT.

Serendipol connects farmers directly with global markets, without intermediary collectors, and with full traceability from farm to finished product. We offer a versatile portfolio of coconut products sourced directly at origin, while advancing and investing in regenerative farming and stronger rural communities.

One trusted partner at origin. More choice, greater transparency and value that goes beyond the product.

Our Process

DIRECT RELATIONSHIPS

Without intermediary collectors

We work directly with farmers, building personal, verifiable and transparent relationships that support full product traceability.

FULL TRACEABILITY

From farm to finished product

Our extension and internal audit teams maintain a high level of supply chain integrity and traceability throughout the process.

SUPPLY CHAIN INTEGRITY

Protecting integrity from origin

Stringent measures are in place, including GPS-monitored lorries to avoid commingling at farm level, in transit, or storage.

Regenerating Communities and Ecosystems

WHAT OUR PARTNERS SAY

“Adopted at a global scale, regenerative organic agricultural lands can mitigate climate change and help build resilient rural communities. Now we’re advancing to another level of environmental stewardship, and we’re proud to demonstrate that with our new Regenerative Organic Coconut Oil from Serendipol.”

DAVID BRONNER

*Cosmic Engagement Officer (CEO),
Dr. Bronner’s*

“Integrity. Open-mindedness. Holistic approach. Excellent communication, cooperation, and transparency. With all of this, Serendipol has probably the perfect supply chain. We wish other suppliers would rise to their standard.”

BARBARA ALTMANN

Head of Strategic Sourcing, Rapunzel

“

“We have always advocated for going back to our roots and applying cultural practices in coconut farming that are more respectful of the earth. We need to restore, not deplete, the planet’s resources. We are proof that widespread regenerative organic practices are possible, but we are also still a Work in Progress. There’s a long road ahead to creating a movement of regeneration.”

”
