PRODUCT DESCRIPTION

> Coconut Milk is a homogeneous liquid emulsion extracted by mechanically pressing fresh, mature and healthy coconut kernels (*Cocos nucifera*). The extracted coconut milk is standardised with potable water to achieve the required fat content. The final product is packed in hermetically sealed, BPA-NI metal cans and sterilised to achieve commercial sterility and shelf stability.

STORAGE, USAGE & THAWING INSTRUCTIONS

<i>Storage</i>	Room temperature (20–30 °C), Keep away from pests, direct sunlight or other heat sources. In cool conditions (below 20 °C) coconut milk has a natural tendency to solidify.
<i>Usage</i>	Coconut Milk has natural phase separation during the prolonged storage period. To avoid this, shake well before use. Once opened, transfer the contents to a non-metallic container, refrigerate and consume within three days.
<i>Thawing</i>	When refrigerated, immerse the can in warm water at 55 °C for a few minutes to thaw/melt the product. Shake well before opening the metal can.
